PROFESSIONAL EXPERIENCE

COGNIZANT — Bangalore, India

Software Engineer | March 2025-Present

Client: Ford | Project: FORD VSEM 2.0

- Develop and maintain Angular interfaces using TypeScript, integrating frontend workflows with Spring Boot REST APIs.
- Build backend microservices using Java 21 and Spring Boot; configure Spring Cloud Gateway for request routing.
- Integrate Anthropic Claude through Spring AI to generate RAG-based responses using retrieved knowledge.
- Implement ONNX embeddings using all-MiniLM-L6-v2 and support retrieval through a file-backed JSON vector store.
- Integrate Python/FastAPI services, PostgreSQL data, Neo4j Bill of Materials (BOM) relationships, and embedded Kafka messaging.
- Collaborate on application modernization and frontend-backend integration; participate in Agile ceremonies and code reviews.

ACCENTURE — Bangalore, India

Software Engineer | November 2021-March 2024

Domain: Healthcare

- Developed RESTful APIs supporting healthcare product customization based on business requirements.
- Implemented scheduled Cron jobs to monitor monthly concept performance and support claim-recovery accuracy.
- Integrated Apache Kafka for application data exchange and real-time processing.
- Conducted code reviews and mentored junior developers on implementation practices, code quality, and maintainability.
