

SUMMARY

Software Engineer with experience developing enterprise applications across automotive and healthcare domains. Skilled in Java 21, TypeScript, Angular, Spring Boot, REST APIs, Microservices, and Kafka. Experienced in designing and developing scalable backend services, frontend-backend integration, Agile development, and code reviews. Hands-on experience with AI-powered applications using Retrieval-Augmented Generation (RAG), Spring AI, Anthropic Claude, and ONNX embeddings.

PROFESSIONAL EXPERIENCE

COGNIZANT

BANGALORE, INDIA

SOFTWARE ENGINEER

03/2025 to Current

- Develop and maintain Angular interfaces using TypeScript, integrating frontend workflows with Spring Boot REST APIs.
- Build backend microservices using Java 21 and Spring Boot; configure Spring Cloud Gateway for request routing.
- Integrate Anthropic Claude through Spring AI to generate RAG-based responses using retrieved knowledge.
- Implement ONNX embeddings using all-MiniLM-L6-v2 and support retrieval through a file-backed JSON vector store.
- Integrate Python/FastAPI services, PostgreSQL data, Neo4j Bill of Materials (BOM) relationships, and embedded Kafka messaging.
- Collaborate on application modernization and frontend-backend integration; participate in Agile ceremonies and code reviews.

ACCENTURE

BANGALORE, INDIA

SOFTWARE ENGINEER

11/2021 to 03/2024

- Created and executed RESTful APIs to assist client customization, allowing healthcare providers to personalize products according to their specific requirements.
- Applied Cron jobs to oversee concept performance monthly, enhancing the precision of claim recovery.
- Monitored code assessments and provided guidance to junior developers to boost code quality and ensure compliance with industry standards.
- Employed Kafka for smooth data exchange among various applications, improving real-time data processing and communication.

EDUCATION

MADANAPALLE INSTITUTE OF TECHNOLOGY AND SCIENCE

Madanapalle, India

Bachelor of Technology: Computer Science And Information Technology

2017-2021

SKILLS

Technical Skills:

- **Languages** : Java 21, Python, TypeScript.
- **Backend & APIs**: Spring Boot, Spring Cloud Gateway, Spring Security, FastAPI, REST APIs, Microservices, JPA, Hibernate.
- **AI & RAG**: RAG, Spring AI, Anthropic Claude, ONNX Embeddings, JSON-based Vector Storage.
- **Messaging**: Apache Kafka.
- **DevOps & Cloud**: Tekton (CI/CD Pipelines), Render (Cloud Deployment).
- **Database**: PostgreSQL, Neo4j, MySQL, Snowflake.
- **Tools** :Git, Maven, Tekton CI/CD, Render.
